

Hello Camp Families,

We're eagerly anticipating your camper's arrival at Hollymont! We've received several calls and emails with questions about our COVID pre-screening and testing process; so we'd like to share the best practices we have observed with the arrival of our staff.

We prefer that all campers and staff take a PCR test within 72 hours of arriving at camp and provide us with written documentation of a negative test.

A Rapid Antigen test is permitted. Here again, written documentation of a negative test is required. If you don't have a source (physician's office, pharmacy, etc.), then you need to **purchase two Rapid Antigen tests**. Please use the first one before you leave home. This prevents you from traveling to camp unnecessarily should the test be positive. If your camper's pre-screen test is positive, then please call us immediately at 828-252-2123.

Put the second Rapid Antigen test in your vehicle or where you can easily retrieve it. When you arrive at the 1st Hollymont check-in station, be prepared to do the 2nd test, wait 15 minutes, and let the nurse read and record the result.

If your camper had COVID and/or tested positive for COVID after April 15, 2022, please call our summer office (828) 252-2123. We will need your camper's name and the date of your camper's illness/positive test. We'll make arrangements for one of our health care professionals to call you and determine the best way forward.

We are praying for a healthy and safe summer. Thank you for doing your part in the process!
